Seminar invitation

The SPUTNIC team invites you to participate in their upcoming videoconferencing seminar. During this seminar we will shed light on **how to use videoconferencing** in inter-university cooperation programmes in a pedagogical sound way.

Format

Our seminars are a blend of interactive videoconferencing between the participating sites and hands-on experience at the own institution.

This means participants will not only learn about the presented new educational technologies through presentations and discussions, but will be offered to experiment and get acquainted with several technologies themselves during the seminar.

The seminars are free of charge!

Practical

Date: 24 th of October 2007

Time: 2pm - 4.30pm CET

Location:

The seminar will be broadcasted to several locations.

Belgium - Heverlee (AVNet K.U.Leuven)

Belgium - Gent (University College Ghent)

Finland - Espoo (TKK Dipoli)

Finland - Vantaa (Laurea)

The Netherlands - Enschede (ITC)

Italy - Rome (UNINETTUNO)

Sweden - Stockholm (EDEN Open Classroom Conference)

Registration: Free online registration on the SPUTNIC website (<http://sputnic.europace.org>)

The SPUTNIC project

SPUTNIC is a one-year project supported by the European Commission under the Socrates, Accompanying Measures Programme. We aim to raise awareness about the beneficial impact of the implementation of new educational technologies that enhance international networking and collaboration for an institution, its staff and its students. Through our website and events, we aim to spread know-how in those educational technologies from successful Minerva and other Socrates projects and to provide a theoretical background as well as practical models and hands-on experience. In particular, our focus will be on four main topics:

Virtual Mobility, Web 2.0 applications, Streaming Media and Videoconferencing.
